1. Claims 1-16 are still pending for examination.
2. The disclosure is objected to because of the following informalities: the executable Internet link such as <http://> should be deleted from the specification (e.g., page 9, line 3, etc.). Appropriate correction is required.
3. The figure 3 of the drawings is objected to under 37 CFR 1.83(a) because they are fully described in the specification. Each box of the drawing should have a numeral number that is fully detail in the specification.

Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The rejection of claims 1-16 under 35 U.S.C § 102(e) as being anticipated by Humpleman et al. [U.S. Patent No. 6,288,716] is respectfully maintained and incorporated by reference as set forth in the last office action.

5. Applicant's arguments filed 5/19/08 have been fully considered but they are not deemed to be persuasive.

6. In the remarks, applicants argued in substance that:

a) Humpleman fails to teach a consumer apparatus responsive to a user-input for initiating retrieval of data from a server based on a predetermined URL.

b) Humpleman fails to teach a proxy device for representing an apparatus on a home network, wherein the proxy device is responsive to a user-input for initiating, via a gateway, retrieval of data from a remote server based on a predetermined URL.

7. In response to paragraphs 6 a) and 6 b) above, Examiner respectfully disagrees because Humpleman clearly discloses the consumer apparatus (home device, Figs. 1, 5, 14) having client devices 12 and server devices 14. A human user uses a browser in the client devices to communicate with the remote service application "S" in HTML, XML including HTTP server capabilities. Thus, it would have been obvious to one of ordinary skill in the art to recognize that the use of a predetermined URL is obvious in the user interface having a browser for communicating between the client devices and the server devices.

A shortened statutory period for response to this action is set to expire 3 (three)

months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
